IDENTIFIERS *Hawaii

ABSTRACT

Data are presented on a series of tables summarizing enrollment trends and the personal characteristics of the 20,286 regular students enrolled in credit programs at the Hawaii community colleges during spring 1982. The tables cover: (1) headcount enrollment in regular credit and special programs; (2) headcount enrollment by campus for the years 1975-76 through 1981-82; (3) selected student characteristics (i.e., sex, educational objectives, major, attendance status, semester hours taken, residence, tuition status, age, citizenship, and registration status); (4) student profiles in terms of these characteristics for fall 1979 through spring 1982; and (5) distribution of majors by campus. The data provided indicate, among other findings, that the regularly enrolled students constituted 78% of the total spring 1982 enrollment. The average student semester hours (SSH) taken decreased from 9.7 in spring 1981 to 9.5 in spring 1982, which may be attributed to the increasing proportion of part-time students and the decline in average SSH taken by these students. Average semester hours taken by full-time students had held steady at 13.8 for six semesters. Demographic data reveal that the median age of the students was 22.6 years, 50.2% of the students were male, and 76.9% were pursuing an associate degree. General and pre-professional majors comprised 38% of the enrollment, while vocational education majors made up another 45%. (KL)

SPRING ENROLLMENT REPORT
UNIVERSITY OF HAWAII, COMMUNITY COLLEGES
SPRING 1982

This is a brief report summarizing data on students enrolled at Honolulu, Kapiolani, Kauai, Leeward, Maui and Windward Community Colleges which are under the Office of the Chancellor for Community Colleges.* The primary emphasis of the report is on students enrolled as classified or unlassified students in credit programs. However, a registration count of students enrolled in other programs (primarily non-credit programs) as well as the registration counts of students in programs sponsored by the Employment Training Office and by Hoomana are included.

Sources of Data

Except for Table 1, the data cited in this report were extracted from the Student Enrollment Reports (SER) as of March 12, 1982. The basic data were derived from student applications, personal history forms and student class registrations.

Highlights

A. Registrations in various community college offerings number 26,159 this spring (Table 1). Of these:

   1. 20,286, 78 percent, are regular students enrolled in credit programs.

   2. 261, 1 percent, are early admits or concurrent registrants enrolled in credit programs.

   3. 1,608, 6 percent, are apprentices or journeyworkers.

   4. 4,004, 15 percent, are registrants in special programs such as Kalihi-Palama Education Center, Waianae-Nanakuli Center, Hoomana, Employment Training Office, public/community services programs at various campuses, etc.

B. Data on 20,286 regular (classified and unclassified) students (Tables 2, 3 and 4) in credit programs show the following:

   1. This spring's enrollment of 20,286 is the highest spring enrollment recorded for the community colleges, second only to this past fall's enrollment.

---

*This report excludes data for Hawaii Community College which will be reported with, and as an organizational component of, the University of Hawaii at Hilo.

...Enrollment data for this spring show an increase of 1,547 students, 8 percent over last spring, but 521 (3%) fewer students than this past fall. However, this is a relatively small fall to spring enrollment decline, especially in light of this past fall's record enrollment.

...Enrollment increased over last spring at all campuses.

2. Several trends are continuing:

...the proportion of unclassified students continues to increase slowly from spring to spring from 13 percent in Spring 1980 to 16 percent in Spring 1982.

...There are proportionately more part-time students than in previous spring semesters: 54 percent this spring compared with 52 percent and 51 percent for the Spring 1981 and 1980 semesters.

...Students are taking fewer credits. The average student semester hours (SSH) taken is 9.5 compared with 9.6 last semester and 9.7 last spring. This is due mainly to the increasing proportion of part-time students and the decline in average semester hours taken by these students. Average semester hours taken by full-time students has held steady at 13.8 for six semesters.

3. The mean and median ages of students are beginning to slowly increase from spring to spring, and fall to fall.

4. There are very little changes in the following:

...96 to 97 percent of the students have Hawaii permanent home addresses.

...the distribution of students from Oahu campuses with local address in Honolulu, Leeward and Windward has remained relatively stable over the past three years.

Summary

The Spring 1982 enrollment figures show an 8 percent increase over figures reported for Spring 1981. This is the highest spring enrollment recorded, and is only 3 percent lower than last fall's enrollment which was the highest recorded for the community colleges.

The community colleges continue to serve more part-time students and are beginning to serve proportionately more unclassified students. Moreover, students are taking fewer credits, and their mean and median ages are slowly increasing.
